

**BmPa**

**Bollettino di Matematica  
pura e applicata**

**Volume I**

*Editors*

**Tommaso Brugarino  
Maria Stella Mongiovì**

Editorial Committee

Pietro Aiena (Palermo)  
S. Twareque Ali (Montreal)  
Maria Letizia Bertotti (Bolzano)  
Luis Funar (Grenoble)  
Renata Grimaldi (Palermo)  
David Jou (Barcelona)  
Valentin Poenaru (Paris-Sud)  
Karl Strambach (Erlangen)

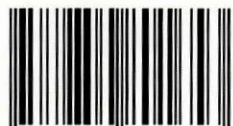

## Contents

P. Aiena, M. Berkani <i>Generalized Weyl's theorem and quasi-affinity</i> .....	1
T. Brugarino, M. Sciacca <i>Painlevé analysis for a generalized nonlinear Schrödinger equation</i> .....	19
D. Jou, M.S. Mongiovi <i>Vortex temperature in turbulent superfluids</i> .....	25
P. Aiena, O. García <i>Property (w) under compact or Riesz commuting perturbations</i> .....	37
E. Tornatore <i>Simple epidemic model by a Markov chain</i> .....	55
L.V. Ardiszone, G. Gaeta <i>Extended Thermodynamics of Turbulent Superfluids: Nonlinear Constitutive Theory</i> .....	63
A. Caggegi <i>A note about additive designs</i> .....	73
D. Jou, M. Sciacca, M.S. Mongiovi <i>Phenomenological description of the vortex density in rotating BEC superfluids</i> .....	85
A. Di Bartolo, G. Falcone <i>Fermat quotient and the p-th root of a p-adic integer</i> .....	95
A. Valenti <i>Gradings on matrices</i> .....	105
P. Aiena, M.T. Biondi, F. Villafañe <i>Property (w) and perturbations III</i> .....	115
M. Sciacca <i>Soliton solutions for an higher order nonlinear Schrödinger equation in optical fiber</i> .....	131
F. Bagarello <i>Heisenberg picture in the description of simplified stock markets</i> .....	151
S. Nardulli <i>Regularity of Solutions of the Isoperimetric Problem</i> .....	161
N. Giovannelli <i>Sull'(a)-integrale generale di un sistema lineare del primo ordine agli(a)-differenziali totali a coefficienti costanti</i> .....	165
R.C. Grimaldi, S. Nardulli <i>Regularity of isoperimetric profiles</i> .....	173
F. Tschinke <i>C*-seminorms and representations on partial*-algebras</i> .....	179
S. Nardulli <i>Some results on the isoperimetric problem for small volumes of a complete Riemannian manifold</i> .....	187
M. Sciacca <i>Non-Equilibrium Thermodynamic analysis of rotating counterflow superfluid turbulence</i> .....	195
